

ERGENE[®]

CHEMICAL GENERAL MAINTENANCE

Technical Data Sheet

ER.605. STAINLESS PICKLING PASTE

DESCRIPTION :

A new concept introduced by ERGENE Chemical is a Stainless Steel Pickling Paste it is having good binding agents and pickling compounds which keeps the product attached to the applied surface, cleans thoroughly the applied metal surfaces and gives a shining surface.

AREAS OF APPLICATION :

Effective on stainless steel, iron, aluminium, zinc, mild steel, brass, copper, silver surfaces, etc.
Heavy equipment.

FEATURES :

Saves labor & time
Environmentally safe
Economical – 1 liter can cover 4 – 6 sq
No flash point or obnoxious fumes
Effective – adheres to the surface completely
High performance polishing action

DIRECTIONS FOR APPLICATIONS :

Applied by brushing and buffing
Initially wet the surface with water and apply the pickling paste with a brush to the surface and allow the surface to react with the chemical for a few minutes. Then rub the surface with a cloth or polishing soft brush and you can see a polished surface. If still shiny surface is deserved repeat the application. While applying the applicators are advised to use safety goggles, neoprene gloves and facial masks.

PACKAGING :

• 5 Kgs / Pail
